THE MAUIAN ON NAPILI BAY MAUI, HAWAII

Situated on one of Maui's most beautiful beaches on Napili Bay, this hotel offers a peaceful escape with a variety of activities and friendly services. The Mauian Hotel features quiet guestrooms without phones, stereos or TVs. For technological amenities, guests can visit the Ohana Room to watch TV or use free wireless internet access. In the morning guests enjoy a free continental breakfast.

APPLICATION

Each of the three Mauian buildings has external stairways with glass railings. Due to overspray from the beachfront showers and the proximity to the ocean; the glass railings have become encrusted with mineral staining making the glass appear almost frosted. It seemed as if the glass would never come clean again.

Maui's EnduroShield® in situ Certified Applicator, Perfectly Clear LLC, was contacted to remedy the problem. The cost saving benefits of EnduroShield® Glass Restoration and Protection versus glass replacement was the best choice for The Mauian. The Perfectly Clear team was able to remove the mineral scaling, polishing the glass back to restore its original luster.

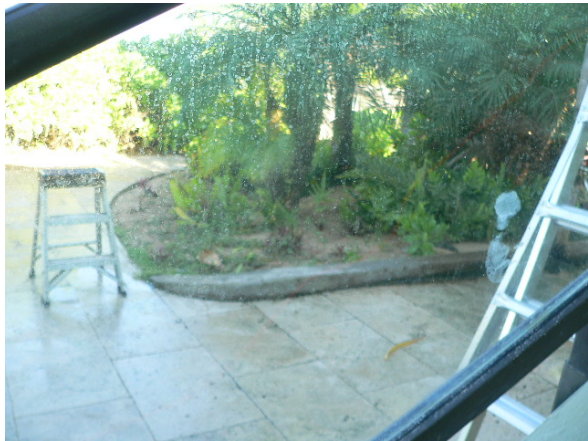

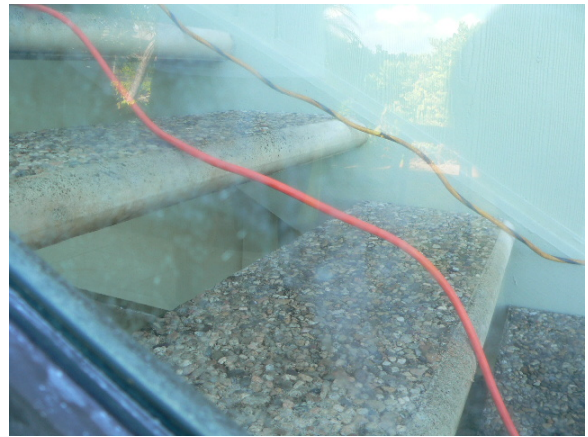

EnduroShield® Protective Coating was then applied to protect the restored glass against future staining and to reduce ongoing maintenance time and costs. EnduroShield® uses state-of-the-art nanotechnology to create a permanent* coating and seal the porosity of the glass, reducing cleaning time and effort.

RESULT

Management at The Mauian is very pleased with the restoration and application of EnduroShield® Protective Coating on the glass. It has made cleaning much easier and less frequent; and the need for expensive glass replacement has been eliminated. EnduroShield will protect the glass from subsequent mineral scaling well into the future. EnduroShield comes complete with a 10 year limited warranty, is environmentally friendly and does not require any revitalizing products to retain the warranty.

*Independently tested and certified for durability to simulate a lifetime of 10 years on interior and exterior use by TÜV Rheinland, Germany.
